PROJECTS:

CONSTRUCTION ADVISOR-FYP Project (Node.js, JS, React)

📅 | 12, 2022 - 12, 2023

During house construction, relying on contractor estimates can lead to uncertainty and result in wastage of materials, time, and resources. This platform reduces the need for extensive contractor interaction and helps users avoid these issues to some degree.

WEB ARRAY CMS - Client Side Website Editor (Vanilla JS, HTML, CSS)

📅 | 12, 2022 - 4, 2023

A js based CMS system that will allow the clients to edit and do small tweaking in their websites including editing images, editing links, texts etc. on their own so you don't have to edit the whole website just for a small change.

INNOVATIVE SCIENTIFIC CALCULATOR (HTML, CSS, JavaScript)

📅 | 8, 2023 - 9, 2023

Integrated simplicity and advanced functionality into a unified calculator, seamlessly switching between basic arithmetic operations and scientific functions with a single, user-friendly interface.

TIC-TAC-TOE-V1.0 (C++)

📅 | 5, 2022 - 6, 2022

This is the Classical 2 Player Tic Tac Toe Game coded in C++. The game has been built with an efficient and userfriendly code so everyone can understand the code.This version comes with ability to allow two players to play on a 3x3 board.

SF Traders Business Website (HTML, CSS, JavaScript)

📅 | 3, 2022 - 4, 2022

Crafted an engaging and responsive website, www.sf-traders.com, leveraging HTML, CSS, and JavaScript to deliver a seamless user experience. Transformed client vision into a visually stunning and functional online presence, showcasing expertise in front-end web development.
